EDUCATION

Arab Academy of Science and Technology   Alexandria, Egypt
BSc in Computer Engineering   Sept 2016- July 2021

EXPERIENCE

AdGroup   Cairo, Egypt
Front End Developer   Sept 2021 - May 2022

- Collaborated with UI/UX designers to develop flawless, responsive web applications with meticulous attention to detail.
- Collaborated closely with backend developers to design dynamic websites, prioritizing optimal user experience. Leveraged technologies like Three.js to enhance interactive elements and create immersive web experiences.

HMASERV   Alexandria, Egypt
Front End Developer   May 2022 – December 2022

- Enhanced functionality and performance of a dashboard as a front-end developer, optimizing user experience and streamlining operations.
- Worked on legacy WebOS/Tizen projects as a Front End Developer, applying modern solutions to optimize the performance of said applications as well as adding new functionality and migrating applications to modern technologies.

Whitepeaks   Lebanon
Front End Developer   April 2023 – August 2023

- Contributed to a flagship streaming web application by implementing new functionality and resolving preexisting bugs, ensuring seamless user experience and enhancing overall performance.
- Collaborated with Backend developers to refactor the flagship streaming web application into an optimized, modern TV Application using techologies like WebOS

PROJECTS

Bayn   Feb 2022 – Mar 2022

- Worked as a contracted front-end developer, transforming multiple screen UI designs into highly responsive web pages, delivering consistent user experiences across different devices on a tight schedule.
- Tech stack used: Nuxt.js, Tailwind, Webpack

Active Code   June 2022 – September 2022

- Worked as a front-end developer primarily responsible for maintaining legacy code, and subsequently refactored the project code using Vue.js, resulting in improved code quality, enhanced performance, and streamlined development processes.
- Collaborated closely with a backend developer to ensure precise, smooth, and instant execution of actions, functions, and requests on the dashboard. Employed state management techniques and various tools to eliminate delays and optimize user experience.
- Tech stack used: Vue.js, VueBootstrap, Axios, Vue Router, Laravel, Vuex and Lottiejs

Shaghf   October 2022 – December 2022

- Collaborated with a UI/UX developer to achieve pixel-perfect responsive designs across multiple displays. Successfully implemented multiple pages while adhering to design specifications and ensuring seamless user experiences.
- Collaborated with backend developer to ensure precise, smooth, and instant actions, functions, and requests on the website, leveraging state management and various tools to eliminate delays.
- Tech stack used: Nuxt.js, Tailwind, Axios, Laravel, Vuex and Lottiejs

ADDITIONAL

- Programming Languages: Typescript, Javascript, C++, C#, Java, HTML/CSS, Python
- Technologies: React, Nuxt, Next, Vue, Tailwind, Express.js, Jest, Storybook.
- Fluent in English, Native in Arabic
